HOW TO
ACCESS
**PRESCRIPTIONS
ONLINE**

NHS

Brent
Clinical Commissioning Group

1 Download Apps or Websites to order your repeat prescriptions

These Apps and websites will work with your GP surgery's computer system so you can view and order your repeat prescription online.

Some may also let you see your medical record and book GP appointments.

Apps and websites to use:

- NHS App
- NHS Website's Repeat Prescription Service
- Co-op Health
- Evergreen life PHR
- myGP
- Patally
- Boots
- Echo

2 Order your prescription

When you have chosen the app or website to use, you will need to **register** to make an account if you don't already have one.

When you have an account, you can order your prescription using that app or website.

Your prescription request will be sent to your GP surgery for approval. The GP may need to talk to you before they approve it.

3 Get your prescription

After your GP surgery has approved it, your prescription will be sent electronically to your regular pharmacy or dispenser, if you have chosen one. There are a few ways you can get your medicines or item.

You may be able to:

- collect it from your nominated pharmacy or dispenser
- have it delivered to you

Ask your pharmacy or dispenser for more information about the delivery services they provide.
